FRAMEWORK PASS RATE

SIGNAL HEALTH	
● CloudTrail logging is active on all trails cloudtrail	● At least one trail covers all regions cloudtrail
● Log file validation enabled (tamper detection) cloudtrail	● Write events observed within lookback window cloudtrail
● All Config rules are compliant config	● Config compliance rate is 90% or above config
● No failures on high-value security rules (MFA, S3, SSH, encryption) config	● Root account has MFA enabled iam
● Root account has no active access keys iam	● All IAM users with console access have MFA enabled iam
● No active access keys older than 90 days iam	● An account password policy exists iam
● Password policy meets PCI-DSS minimum requirements iam	● AWS Security Hub is enabled securityhub
● PCI DSS Security Hub standard is enabled securityhub	● CIS AWS Foundations benchmark standard is enabled securityhub

● AWS Foundational Security Best Practices standard is enabled
securityhub

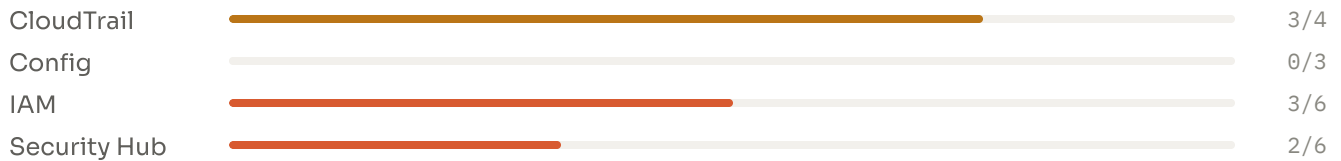

● Zero CRITICAL severity findings in Security Hub
securityhub

● Zero HIGH severity findings in Security Hub

ACTIVE FINDINGS — REMEDIATION WORKLIST

CRITICAL Security Hub CRITICAL finding	CRITICAL Security Hub CRITICAL finding
--	--

AWS:::Account:033113129660

SSM documents should have the block public sharing setting enabled

Remediation: For information on how to correct this issue, consult the AWS Security Hub controls documentation.

AWS:::Account:033113129660

IAM root user access key should not exist

Remediation: For information on how to correct this issue, consult the AWS Security Hub controls documentation.

CRITICAL Security Hub CRITICAL finding

AWS:::Account:033113129660

Hardware MFA should be enabled for the root user

Remediation: For information on how to correct this issue, consult the AWS Security Hub controls documentation.

CRITICAL Security Hub CRITICAL finding

AWS:::Account:033113129660

AWS Config should be enabled and use the service-linked role for resource recording

Remediation: For information on how to correct this issue, consult the AWS Security Hub controls documentation.

HIGH High-value AWS Config rule failure

iam-password-policy

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-ensure-expires-0552ca62

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-lowercase-letter-check-d0b4e506

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-minimum-length-check-aef1a50e

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-number-check-539cde3e

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-prevent-reuse-check-4e29d193

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-recommended-defaults-88332cf6

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-symbol-check-30ccdbcd

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-password-policy-uppercase-letter-check-a4e464b8

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-iam-root-access-key-check-1158bea9

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-s3-bucket-ssl-requests-only-5a8395da

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH High-value AWS Config rule failure

securityhub-vpc-flow-logs-enabled-e32fedf1

Remediation: Remediate the failing resources shown in AWS Config console.

HIGH Security Hub HIGH finding

arn:aws:ec2:us-east-1:033113129660:security-group/sg-0c908643ad4447bf7

VPC default security groups should not allow inbound or outbound traffic

Remediation: For information on how to correct this issue, consult the AWS Security Hub controls documentation.

HIGH Security Hub HIGH finding

arn:aws:ec2:us-east-1:033113129660:security-group/sg-0be23d0bf6ece8843

VPC default security groups should not allow inbound or outbound traffic

Remediation: For information on how to correct this issue, consult the AWS Security Hub controls documentation.

HIGH Security Hub HIGH finding

arn:aws:ec2:us-east-1:033113129660:snapshotblockpublicaccess/033113129660

Amazon EBS Snapshots should not be publicly accessible

Remediation: For information on how to correct this issue, consult the AWS Security Hub controls documentation.

MEDIUM Config rule failure: cloud-trail-cloud-watch-logs-enabled

compliance-trail

type=AWS::CloudTrail::Trail; The CloudTrail trail is not associated with any CloudWatch Logs log group ARN.

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: iam-password-policy

033113129660

type=AWS::IAM::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-cloud-trail-cloud-watch-logs-enabled-edaceb0d

compliance-trail

type=AWS::CloudTrail::Trail; The CloudTrail trail is not associated with any CloudWatch Logs log group ARN.

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-cloud-trail-encryption-enabled-e96b8137

compliance-trail

type=AWS::CloudTrail::Trail;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-cloud-trail-log-file-validation-enabled-905a745d

compliance-trail

type=AWS::CloudTrail::Trail;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-ebs-snapshot-block-public-access-bfb413d4

033113129660

type=AWS::EC2::SnapshotBlockPublicAccess;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-ec2-ebs-encryption-by-default-9a7ffc6a

033113129660

type=AWS::EC2::InstanceProfile; EBS Encryption by default is not enabled.

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-ec2-vpc-bpa-internet-gateway-blocked-71668c50

033113129660

type=AWS::EC2::VPCBlockPublicAccessOptions; InternetGatewayBlockMode is not one of block-bidirectional or block-ingress.

MEDIUM Config rule failure: securityhub-iam-password-policy-ensure-expires-0552ca62

033113129660

type=AWS::IAM::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-password-policy-lowercase-letter-check-d0b4e506

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-password-policy-minimum-length-check-ae1a50e

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-password-policy-number-check-539cde3e

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-password-policy-prevent-reuse-check-4e29d193

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-password-policy-recommended-defaults-88332cf6

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-password-policy-symbol-check-30ccdbcd

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-password-policy-uppercase-letter-check-a4e464b8

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-root-access-key-check-1158bea9

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-iam-support-policy-in-use-d2692ff6

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-macie-status-check-b2c57c9a

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-root-account-hardware-mfa-enabled-71a35f10

033113129660

type=AWS::::Account;

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM Config rule failure: securityhub-s3-account-level-public-access-blocks-periodic-1832261b

033113129660

type=AWS::::Account; Amazon S3 Block Public Access is not configured on this Account.

Remediation: Remediate in AWS Config console or correct via IaC.

MEDIUM

Config rule failure: securityhub-s3-bucket-logging-enabled-bd75aebb

aws-cloudtrail-logs-033113129660-0e30d7a9
type=AWS::S3::Bucket;

Remediation: Remediate in AWS Config console or correct via IaC.
